

SPRING TINE RAKE

Designed as an attachment to the GreensGroomer for Natural Turf or as a singular attachment using our Three-Point Hitch assembly (sold separately). The Spring Tine Rake for Natural Turf is a great piece for de-thatching turf and promoting turf health.

The Spring Tine Rake comes as an attachment for the GreensGroomer. It consists of 3 tine shafts loaded with 42 adjustable tines set at 7/8 inch spacing.

De-thatching your turf can rejuvenate the turf system, remove old grasses, or remove dead decaying materials. De-thatching eliminates the 'thatch habitat' for most harmful turf insects and fungus. Thatching away harmful turf debris allows turf to breath and to get plenty of sunlight.

Another benefit of thatching your turf with the Spring Tine Rake is to scarify the surface of the soil. This means that you are going to have a much easier time over seeding it after you thatch.

One use of the Spring Tine Rake is to pull up "runners" that are common with certain types of grass. Using the Spring Tine Rake on a frequent basis before mowing keeps these errant runners in check and provides for a more consistent mow quality.

SPECIFICATIONS*

Model	STR
Main Frame	10 gauge steel construction
Length	10-5/8 inches
Width	74-1/2 inches
Weight	85 lbs.
Finish	Powder coat with 6-step pre-wash including de-greaser and anti-rust coating
Tines	3/16 diameter w/ 40° tip bend
Shipping Crate	76" x 22" x 21"
Crated Weight	150 lbs.
