

Consider A Local Dealer

GreensGroomer sells and supports Parts Sales through our Dealer Network. Visit our [Dealer Locator](#) website page and search for a dealer near you. It may be a Dealer you already know and have a purchase history with. This is a common method for many looking for GreensGroomer parts.

If you've reviewed your parts needs and looked through our parts lists, our dealers can easily handle your order. If you are uncertain about your needs, contact us and we can help you get what you need.

Ordering Direct

One advantage of purchasing directly from us is that you may already have contacted us with questions on your particular need. At that point, you can save yourself another phone call and complete your order fast. We base all parts sales based on our established retail price.

GreensGroomer accepts credit cards for payment, advance payment by company check, or through billing terms if an account is established.

Consult Our Sales Team

As the manufacturers of the equipment, we are the best source for information on your equipment. Our dealers are good too, but most of our dealers sell other product lines and service products and may not be as close to the detailed information we possess.

Whether we sell you parts direct or through a dealer, we're here to help you. There is typically no difference in cost as dealers sell our parts at the listed retail price. In many cases, we drop ship parts for them.
