

# INTEGRATED SPORTS TURF GROOMER

The Synthetic Sports Turf Groomer conditions synthetic turf surfaces and relieves compaction while delivering greater labor efficiencies, ease of operation, and a lower total cost of ownership.

- **Stands Up Synthetic Fibers**
- **True One-Pass Performance**
- **Superior Balance for Consistent Grooming**
- **Used in Wet and Dry Conditions**
- **Patented Quadruple Direction Design**
- **Works on All In-filled Surfaces**

Simple in design with heavyduty construction, the focal point of this patented design are the precise brush dimensions and angles. This allows grooming in four directions, standing up turf fibers and leveling infill material. The integrated rake simplifies equipment requirements and gives the facility flexibility for on-demand raking without equipment change-over.

The integrated Spring Tine is controlled through a simple rotating lever. This allows the operator to quickly and easily rotate tines upwards and out of the way when not needed. The spring tines are completely adjustable, so the depth of raking can be controlled by the facility. Simple markings on the lever rail allows the operator to precisely dial in tine depth.
